

The image is a title card for the game Dying Light. It features a light gray, textured background. At the top and bottom edges, there are black silhouettes of many zombie hands reaching upwards. The title "DYING LIGHT" is centered in a large, bold, black font. The word "DYING" is on the left, and "LIGHT" is on the right. Between them, the phrase "GOOD NIGHT GOOD LUCK" is written in a smaller, orange, sans-serif font.

# DYING LIGHT

GOOD NIGHT GOOD LUCK

## HOW TO SURVIVE

**NOTE: Please make sure your game is updated to the newest version.**

## HOW TO SURVIVE

**LEARN TO CLIMB** - Press and hold the JUMP button to jump and grab the ledge you're looking at. You can start climbing while standing, walking or running. Remember to look at the ledge you want to grab.

**COMBAT IS OPTIONAL** – You don't have to fight if you don't want to. In most situations, the game gives you many other options, such as sneaking past the enemy or distracting them using decoys.

**LOOTING IS A MUST** – Always search lockers, chests, cupboards, and fridges. When outside, look for car trunks, vending machines, and ATMs. Looting brings you crafting components, goods to sell, and more.

**BUY & UPGRADE WEAPONS** – The best weapons are available in shops. If you feel your current equipment isn't powerful enough, spend some cash at traders in hubs and safe zones. Look for upgrades to improve weapon stats such as balance and durability.

**DON'T SKIP NIGHTS** – Playing at night doubles all the Agility and Power experience points you get. It's a great way to level up faster and unlock better skills.

**UNLOCK SAFE ZONES** – Safe Zones provide you not only with shelter but are also your respawn points when you die. Unlock new zones to streamline your exploration of the city.

**USE SURVIVOR SENSE** - Rely on your Survivor Sense. Just press the button to highlight your current objective, lootable objects around you, and the more dangerous enemies.

**MAKE USE OF UV LIGHT** – The UV flashlight and UV flares can be used to stun Night Walkers and Volatiles. It's also the only way to drain stamina off the Night Hunter during asymmetric multiplayer matches.

**SIDE-QUESTS & ENCOUNTERS** – Complete as many side-quests as you can and help survivors in distress across the zone to level up your Survivor Rank faster and unlock new skills.

**AVOID PURSUITS** – If you're being chased by night zombies, try to lose them by changing the direction of your run and use firecrackers as decoys. When your minimap turns white, find a place to hide and wait the pursuit out.

**RECOVER AIR-DROPS** – Bring them to the Quartermaster to obtain rewards and Survivor Rank experience. Here's a pro tip: night airdrops are always more valuable!

**ENVIRONMENTAL KILLS** – Lure zombies to water puddles near electric wires and switch on the power; throw enemies at spikes or off the roofs; use explosive throwables and guns to blow up red gas cylinders; set fire to pools of oils, and much more...

**WEAPONIZED MOVEMENT** – Turn your parkour skills into a powerful tool of combat. Climb up and strike from above for additional damage and chance to knock down enemies. Jump off zombies to quickly attack from the air. Combine such skills as slides, tackles, and drop kicks with other moves and attacks.

**CONSUMABLES** – When you're low on health and out of medkits, look for consumables - food packages that allow you to regain small amounts of energy. They can be found almost anywhere.

**WEAPON DURABILITY** – Durability of weapons depletes with use and you need metal parts to repair them. The number of possible repairs is limited and depends on the rarity of the weapon. Damaged weapons are practically useless in combat.
